

Safety

The BTMLSS marketplace exists only as a means to connect buyers and sellers based on products of interest. We make best efforts to regulate the marketplace to ensure it is safe for users; however you should use suggested practices and common sense when meeting with strangers from an online platform. Our suggestions can be used as guidance but you should also do your own due diligence prior to exchange of funds and/or merchandise and meeting with other users.

- Meet in a public and well lit place
- Let someone know where you are going or bring a friend
- Use payment services which offer buyer/seller protection while in person
- Do not pay for items until you have received them
- Do not share personal information or message outside of the app
